A flexible solution for every space
Our products help to expand the imagination of designers. This applies especially to the development of flexible space-saving solutions for hotels, congress and convention centers, schools, restaurants, shopping centers and commercial buildings. Our greatest strength is our ability to deliver custom work. The Palace series, especially, is proof of this: a durable movable wall that is extremely easy to operate. In addition to our standard models Palace 80 and 110 we offer many other possibilities, all of them functional and fire-resistant, if required. The design can be tailored seamlessly to your project. For instance, if you wish to divide a room without any loss of sound insulation and transparency, our latest model Transpalace may offer the best solution.

Every square metre of your area to be divided can be used as efficiently as possible. We offer durable and quickly realisable solutions for every work or meeting place. Of course, we also offer optimal support; not only during the design and construction process, but afterwards as well.
From tiny offices to huge conference halls: our stylish, functional Palace movable walls can give every space a new dimension.

In no time at all, Palace will enable you to divide a large space into smaller units. Thanks to our extensive experience with bearing technology and the rolling properties of a variety of different materials, we can find a high-quality, durable rail and trolley construction for every application that will also ensure an optimal ease of operation. Floor guidance mechanisms will not be an obstruction to your floor. Stability as well as perfect sound insulation: two typifying characteristics of Palace walls. The spindle mechanism and the so-called acoustic pressure sleeves secure the different panels firmly between the floor and the track. In addition, the parking possibilities are virtually unlimited.
Unlimited possibilities in design
Efficiency and safety, as well as esthetics and stability: that is what the Palace 110 stands for. This robustly executed movable wall satisfies even the toughest requirements.
Palace 110

- Sound insulation of 37 to 57 dB Rw
- Durable and stable metal construction
- Possible heights of more than 15 m
- Optimal flexibility, curved walls and tracks possible
- Available in a fire-resistant model of up to 30 and 60 minutes
- Available in a broad range of finishes
- High-quality track and trolley system
- Semi-automatically operated top and bottom seals possible

The Palace 110 makes it much easier to organise your space: a high degree of sound insulation, single or double doors, heights of more than fifteen metres, curved panels if required, semi-automatic operation and a fire resistance rating of more than sixty minutes!

The Palace 110 proves that quality and design can be perfectly integrated. This wall can be adapted to suit every interior design. There are countless possibilities as shape, material, colour, finished edges, corner elements and glass openings. Even curved walls and tracks can be delivered.

The Palace 110 is perfectly suited to create silence, with panels measuring only 110 mm in thickness. Even when this concerns heights of more than 15 metres. Custom solutions are our specialty. In consultation with Häfele, you can determine the parking positions and the lay-out of the track, tailored to your personal requirements. For those who require a product that is extremely easy to operate, our semi-automatically operated movable walls may be the very best solution. Häfele aims to deliver products that are completely tailored to your needs.
Elegance and sound insulation
The Palace 80 has a panel thickness of only 80 mm. This means a minimal loss of space, while retaining excellent acoustic properties. This panel wall’s slim design contributes to its ease of handling, still incorporating an optimal stability. Because they weigh so little, the panels glide very easily over the track system. And we can also guarantee optimal stability.

Palace 80
- Sound insulation from 36 to 44 dB Rw
- Maximum height 3.05 m
- Stable and self-supporting frame construction
- Enormous flexibility thanks to a broad range of panel models

Models
- Standard version with covering profiles
- Very easy to operate due to light construction
- High-quality track and trolley system

For many types of users, the Palace 80 may very well be the ultimate solution for creating more space and flexibility. This movable wall with a panel thickness of only 80 mm will guarantee an optimal ease of operation with only the slightest loss of space.

The favourable cost aspect also makes it an excellent alternative. Furthermore, the Palace 80 proves that a slim construction does not affect the stability and sound insulation. The trolleys of this wall are suspended on metal bearers running horizontally through the panel. The result is a self-supporting structure.
Transpalace

- Sound insulation till 44 dB Rw
- Design
- Glass can be replaced separately
- Aluminium profile, available in every RAL colour
- Slim glass available in every colour
- Welded aluminium/steel construction

The most exclusive model in the Palace series is the Transpalace. This sturdy, transparent movable wall has been allow you to retain the transparency, while enjoying what the finished with double-layer safety glass.

Transpalace will other Palace walls have to offer, such as a high degree of sound insulation, a stable frame and a beautiful design. The technology has been subtly incorporated behind a thin pane of glass, in the colour of your choice.
Semi-Automatic

More comfortable and convenience it came with semi-automatic operation. The top and bottom pressure seals are controlled by electrical device. Closing or releasing of the adjusting panel shall be controlled electrically by a key-switch positioned on one side of the panel.

In order to overcome power failure, we supply an emergency transformer, which can be used when the main transformer of the wall does not able to give 24 V to the wall. With the emergency transformer, panels can be overruled and released. This transformer is not battery operated and needs to be connected with a normal 230 V power main power supply.
mono

Flexibility with robust simplicity
With the Mono we emphasises the most essential aspects of movable walls: flexibility and the efficient use of space in as simple a form as possible. The single panels form the basis of a robust accordion style folding wall that is very easy to use. The ball bearing trolleys with PVC treads run smoothly and silently along the high-quality aluminium track. This hard-wearing system guarantees easy and silent operation.

The Mono does not require floor guides. Our wall systems aren’t only easy to use, they’re also easy to assemble. It’s easy to install the wall: using clear assembly instructions, the Mono can, in principle, be installed by one person. Of course, you can always call upon one of our experienced assembly teams. The Mono is available in diverse panel widths and many combinations are possible: closure on one side, centre closure or closure on both sides. It’s also possible to connect several walls together. The closing post is fitted with a simple lock function. We also offers a heavier lock and a cylinder euro lock. When the wall is completely open, the panels form an attractive partition that takes up very little space.

Progress

Budget-friendly flexibility
We put the dynamic use of space within everyone’s reach with the Progress. The most important characteristics of this folding wall are ease of operation, compact dimensions and efficient design. Slim construction and a well thought-out, patented hinge system mean that you benefit from great user-friendliness. Despite its lightweight construction, Progress has the desired stability and an excellent acoustic value (Rw) of 28 or 31 dB. With the Progress, you can quickly and effortlessly make new, comfortable rooms. You can also choose from closure on one side or centre closure. A cylinder euro lock is optional.

Progress
- Double folding wall
- Maximum ease of operation
- Favourable price-quality ratio
- Flat or accordion wall
- Acoustic value (Rw) of 28 or 31 dB

The dB values are measured in accordance with ISO 140 standard, the Rw values are determined in accordance with ISO 717 standard. Test reports are available upon request.

Create privacy with an open look and feel

The movable glass walls in our President series are elegant, offer countless practical applications and create a perfect partition for those whose foremost interests include spaciousness, design and transparency.
Clear options for every space

Movable glass walls offer a variety of applications: in shops, hotels, cafes and restaurants and government, banking and insurance buildings, for instance. The President series makes it easy for you to create privacy, while its transparency and open look and feel will allow the space itself to remain intact. Thanks to its slim construction, this functional and stable wall will take up only a remarkably small amount of space in a parked position. From shopping-arcade to reception area: the President is stylish and will let in plenty of light. For additional privacy, the glass can be etched, sandblasted or decorated with foil. Your company logo, texts and entire designs can also be added. Because we develops and produces the President series completely under its own management, there’s practically no limit when it comes to turning creative ideas into practical solutions. A selection can be made, for instance, between straight and curved, as well as segmented panels. Let your imagination run free and discover, with the help of our consultants, which movable glass wall will be shown to its best advantage in your project!
An enormous degree of user-friendliness and an extensive range of options as to design and finish are among the President’s greatest advantages. In addition to design, we also pay a great deal of attention to user-friendliness.

**President**

- Completely transparent partition
- Height up to 3.5 m
- Curved segmented models available
- Virtually unlimited choice of options in pattern and design
- High-quality track and trolley system
- Extremely durable clamping construction without necessity of drilling the glass
- Profiles and track available in several colours
Advantages of a well engineered design
Perfection to even the tiniest details: that’s one of our typifying characteristics. From raw materials and a perfectly monitored production process to finished products of the finest quality. Our standard options include an extensive choice of glass types and finishes. Regardless of whether your interior is dominated by light or dark colours: the aluminium parts of our President series are available in nearly every colour imaginable. An important detail: the glass panels of the President series have been developed so that vertical aluminium profiles will not be necessary. So no matter where your wall is to be installed, you can always choose an unbroken design without the obstruction of unnecessary frames. Clarity and transparency are among our highest priorities.
